

# Biological Food Production Workshop

**A new direction in the production  
of food with integrity**

*Come along for  
an inspirational  
day of learning*

**SATURDAY  
APRIL 29th  
9am - 3pm**

*& enjoy our  
peaceful bush  
setting by the  
Mongarlowe River*

**Learn to GROW ABUNDANT NUTRIENT DENSE FOOD naturally  
in your Home Garden or Commercial Farming Enterprise using the  
latest innovative developments in organic land and plant care.**

**“The secret to sustainable farming is to create and maintain a  
biologically active, living soil with balanced, abundant and a  
diverse population of microbes; and high quality water”**

**In this fascinating workshop Robert Gourlay, Managing Director & Co-Founder of  
Phi'on, unfolds the secret life of soil and plants, innovative Living Water  
technology, and the essentials behind successful food production.**

## **YOU WILL LEARN HOW TO:**

- Improve soil quality
- Decrease growing period to plant maturity
- Increase plant resilience to temperature variations
- Increase plant yield & plant nutrient uptake by up to 4 fold
- Significantly decrease insect attack, plant diseases & fungal attack
- Use Biological formulations for water conditioning and odour control  
....and grow nutritious chemical free produce on any scale.

**PLUS, get to see our unique biological formulation production processes first  
hand, and examine a small scale working farm production facility.**

**Book by MARCH 30th for the special EARLY BIRD PRICE of \$150  
Includes Delicious Lunch and Refreshments  
Full price investment \$180**
