

On-site Microbial Brewing

A New Approach to Farming for Profit & Integrity

Would you like to set up your own on-site organic, biological liquid fertiliser production facility to regenerate soil and optimise plant growth and health for your farm or food growing venture?

Resonate Research Pty Ltd is conducting a workshop designed for farmers and food producers who are looking for more sustainable, affordable, and effective solutions to successful food or plant production, animal management, and land regeneration. This would include primary producers of any type and scale, nurseries, medicinal plant production, backyard farmers, etc.

This workshop is conducted over 1 day and provides the necessary information, including a digital manual of how to establish a microbial production facility for self-use or on-selling of biological products. All necessary mother and starter cultures, and consultancy support are provided to support a start-up operation.

Numbers for this workshop are limited to a small group so please book in early to avoid disappointment.

Your investment of \$250 includes full digital training manual and digital PowerPoint pdf presentation.

Saturday February 10th, 2018, 10am to 3pm
444 Northangera Rd, Mongarlowe
